

PRACTICAL 5 a

Import the datawarehouse data in Microsoft Excel and create the Pivot table and Pivot Chart

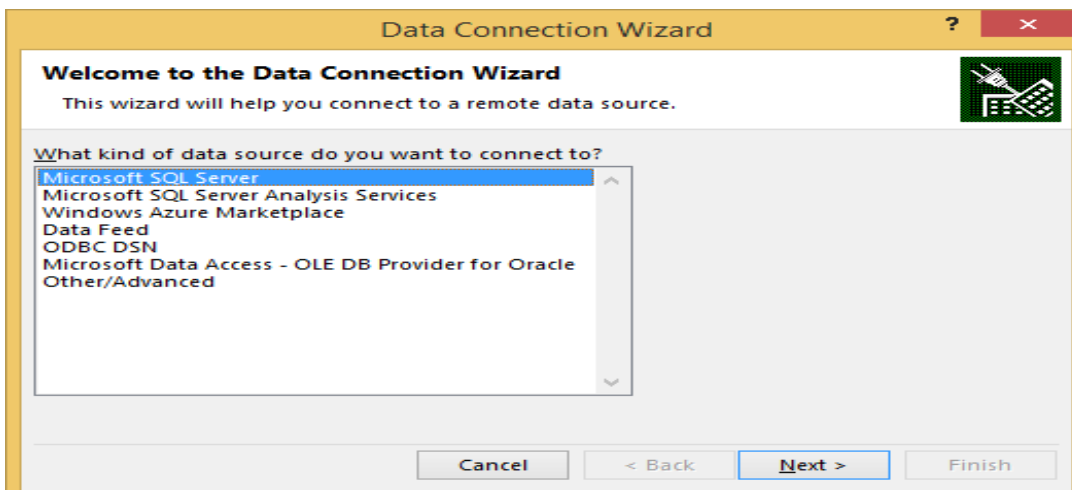

(Ms Office Professional is used to make sure Power View is enabled for visualization.)

Step 1: Open Excel 2013 (Professional)

Go to Data tab → Get External Data → From Other Sources → From Data Connection Wizard

Step 2: In Data Connection Wizard → Select Microsoft SQL Server → Click on Next

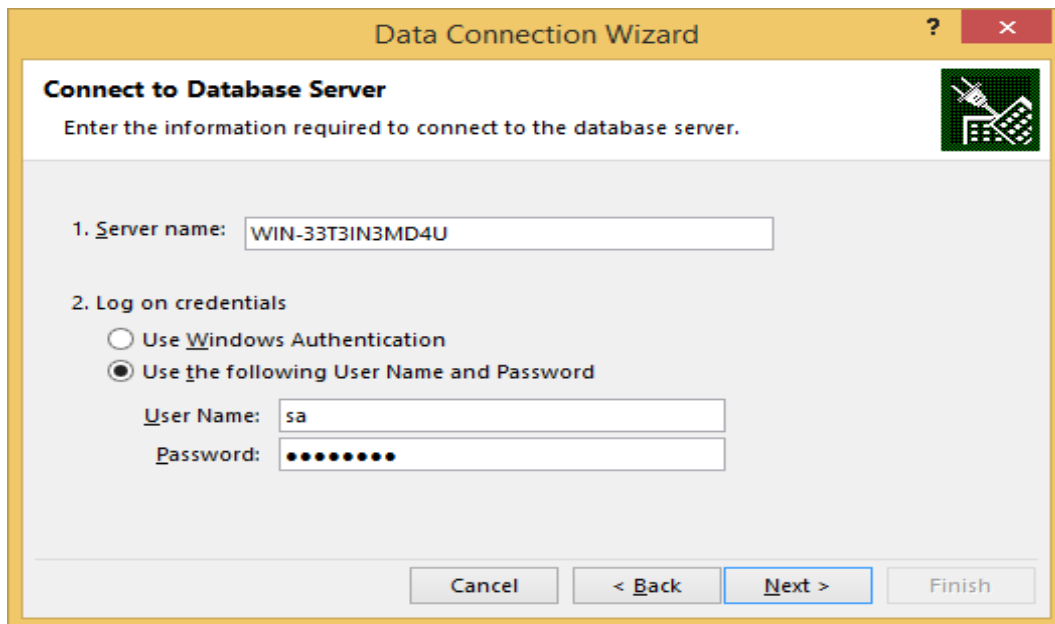

Step 3: In connect to Database Server provide Server name(Microsoft SQL Server Name)

Provide password for sa account as given during installation of SQL Server 2012 full version)

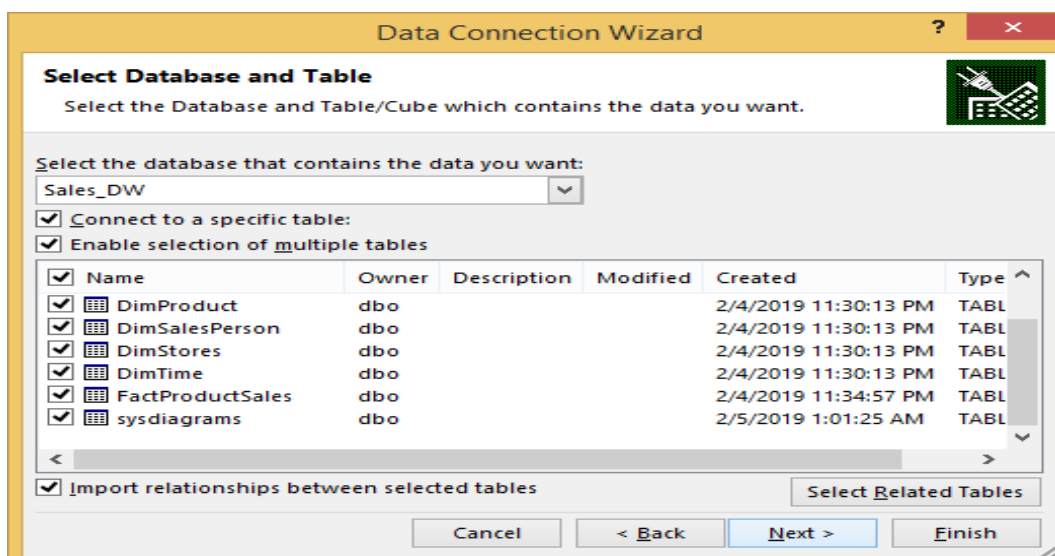

Password: admin123

Click on Next

The screenshot shows the 'Data Connection Wizard' window, specifically the 'Connect to Database Server' step. The window has a yellow title bar and a green icon in the top right corner. The main area is white with a yellow border. The title 'Connect to Database Server' is in bold. Below it, the instruction 'Enter the information required to connect to the database server.' is displayed. The first step is '1. Server name:', with a text box containing 'WIN-33T3IN3MD4U'. The second step is '2. Log on credentials', with two radio buttons: 'Use Windows Authentication' (unselected) and 'Use the following User Name and Password' (selected). Below the radio buttons are two text boxes: 'User Name:' containing 'sa' and 'Password:' containing a masked password '.....'. At the bottom, there are four buttons: 'Cancel', '< Back', 'Next >', and 'Finish'. The 'Next >' button is highlighted with a blue border.

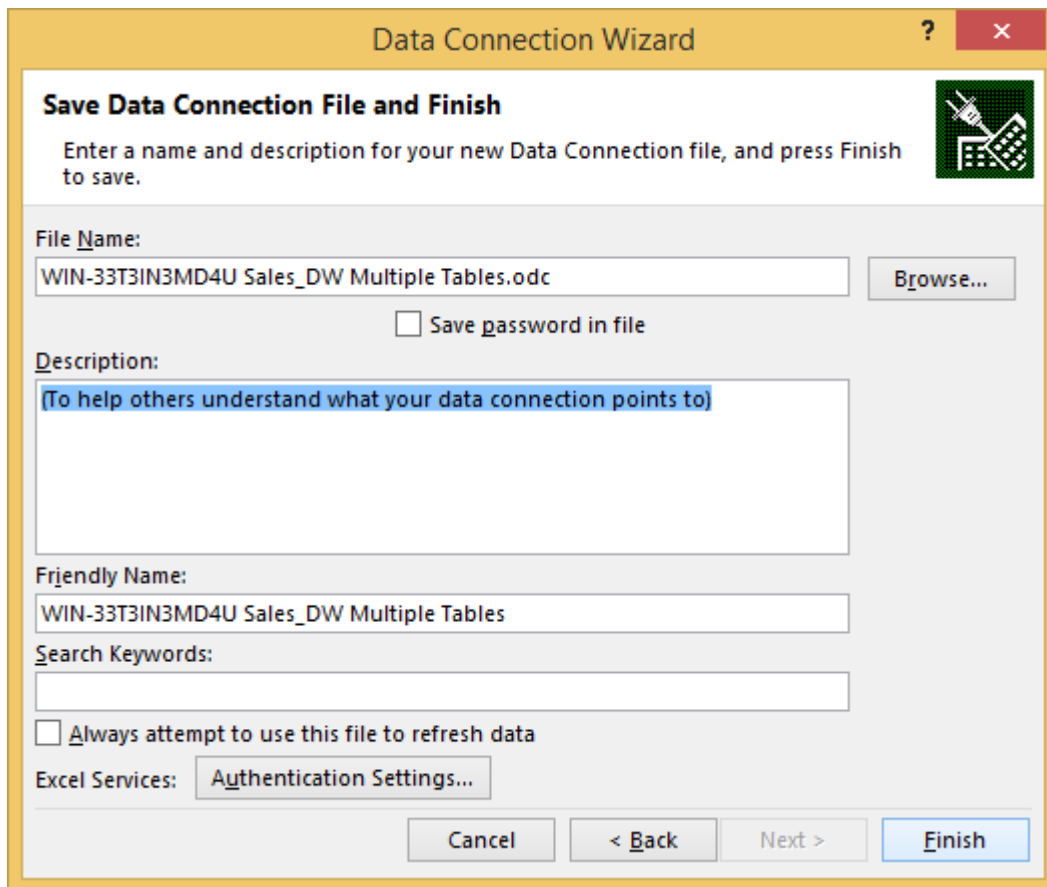

Step 4: In Select Database and Table→ Select Sales_DW (already created in SQL) → check all dimensions and import relationships between selected tables

The screenshot shows the 'Data Connection Wizard' window, specifically the 'Select Database and Table' step. The window has a yellow title bar and a green icon in the top right corner. The main area is white with a yellow border. The title 'Select Database and Table' is in bold. Below it, the instruction 'Select the Database and Table/Cube which contains the data you want.' is displayed. The first section is 'Select the database that contains the data you want:', with a dropdown menu showing 'Sales_DW'. Below this are two checkboxes: 'Connect to a specific table:' (checked) and 'Enable selection of multiple tables' (checked). The next section is a table with columns: 'Name', 'Owner', 'Description', 'Modified', 'Created', and 'Type'. The table contains six rows of data, all of which are checked. At the bottom, there is a checkbox 'Import relationships between selected tables' (checked) and a button 'Select Related Tables'. At the very bottom, there are four buttons: 'Cancel', '< Back', 'Next >', and 'Finish'. The 'Next >' button is highlighted with a blue border.

Name	Owner	Description	Modified	Created	Type
DimProduct	dbo			2/4/2019 11:30:13 PM	TABL
DimSalesPerson	dbo			2/4/2019 11:30:13 PM	TABL
DimStores	dbo			2/4/2019 11:30:13 PM	TABL
DimTime	dbo			2/4/2019 11:30:13 PM	TABL
FactProductSales	dbo			2/4/2019 11:34:57 PM	TABL
sysdiagrams	dbo			2/5/2019 1:01:25 AM	TABL

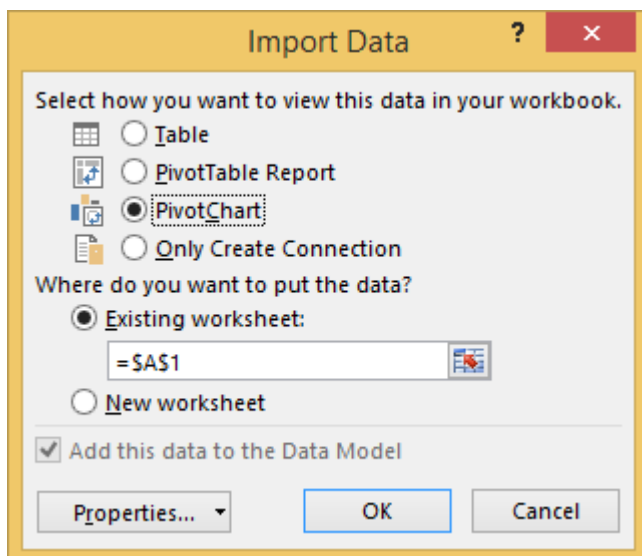

Step 5: In save data connection files browse path and click on Finish

The 'Data Connection Wizard' dialog box is shown, titled 'Save Data Connection File and Finish'. It contains the following fields and options:

- File Name:** A text box containing 'WIN-33T3IN3MD4U Sales_DW Multiple Tables.odc' and a 'Browse...' button.
- Save password in file:** An unchecked checkbox.
- Description:** A text box containing '(To help others understand what your data connection points to)'.
- Friendly Name:** A text box containing 'WIN-33T3IN3MD4U Sales_DW Multiple Tables'.
- Search Keywords:** An empty text box.
- Always attempt to use this file to refresh data:** An unchecked checkbox.
- Excel Services:** A button labeled 'Authentication Settings...'.
- Buttons:** 'Cancel', '< Back', 'Next >', and 'Finish'.

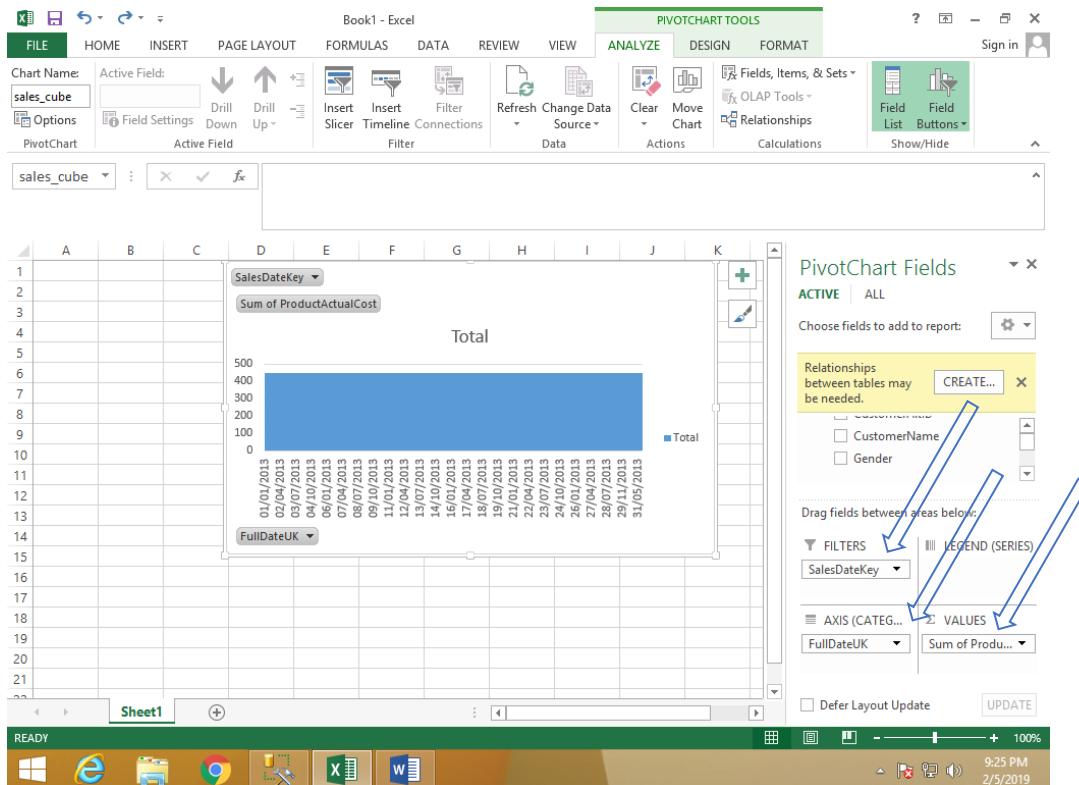

Step 6: In import data select Pivot Chart and click on OK

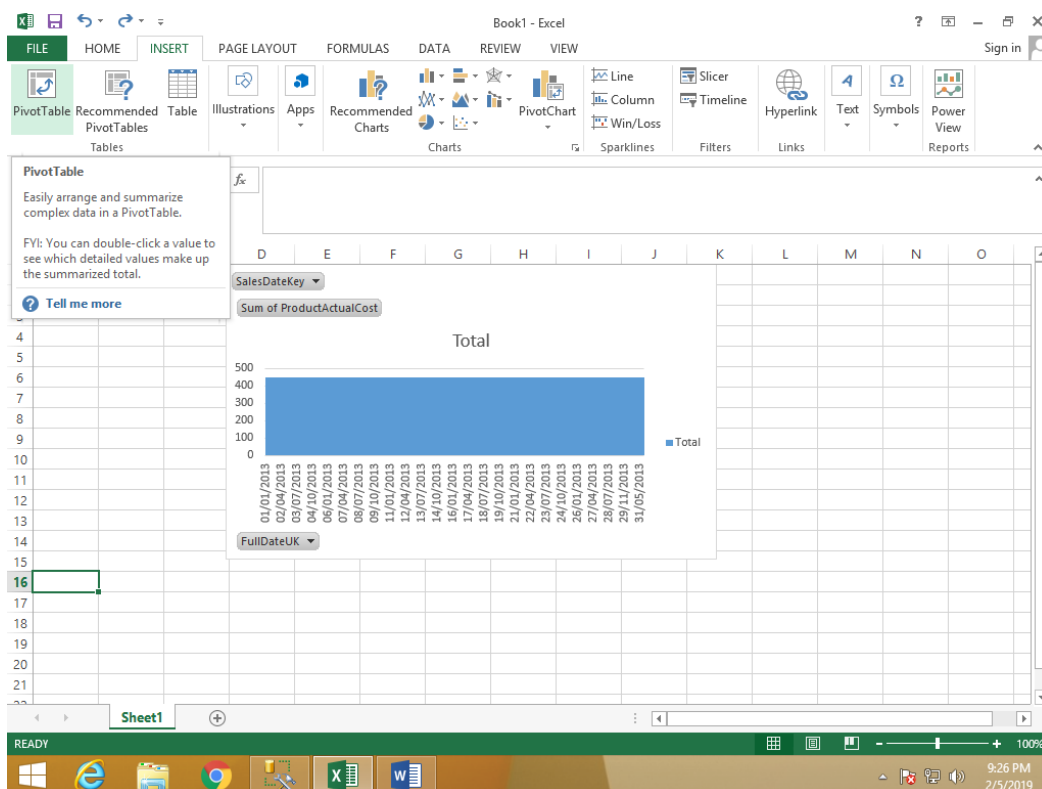

The 'Import Data' dialog box is shown, titled 'Select how you want to view this data in your workbook.' It contains the following options and fields:

- Select how you want to view this data in your workbook:**
 - ☐ Table
 - ☐ PivotTable Report
 - ☒ PivotChart
 - ☐ Only Create Connection
- Where do you want to put the data?**
 - ☒ Existing worksheet:
 - Text box containing '= \$A\$1' and a small icon.
 - ☐ New worksheet
- Add this data to the Data Model:** A checked checkbox.
- Buttons:** 'Properties...' (dropdown), 'OK', and 'Cancel'.

Step 7: In fields put SalesDateKey in filters, FullDateUK in axis and Sum of ProductActualCost in values

Step 8: In Insert Tab → go to Pivot Table

Step 9: Click on Choose Connection to select existing connection with Sales_DW and click on open

Create PivotTable ? [X]

Choose the data that you want to analyze

☐ Select a table or range

Table/Range: []

☒ Use an external data source

Choose Connection...

Connection name: WIN-33T3IN3MD4U Sales_DW Multiple Tabl

Choose where you want the PivotTable report to be placed

☐ New Worksheet

☒ Existing Worksheet

Location: Sheet1!\$A\$16

Choose whether you want to analyze multiple tables

☒ Add this data to the Data Model

OK Cancel

Existing Connections ? [X]

Select a Connection or Table
